**RE: Plug and Abandonment Move-in-Rig-Up Notice**

Dear Resident:

GMT Exploration Company LLC is providing this notice to inform nearby residents that we intend to perform an Energy and Carbon Management Commission (ECMC) required re-entry plug and abandonment on the well listed below per the ECMC regulations.

A service rig is scheduled to move onto this location during the week of July 13, 2026. Operations are estimated to take 10–14 days and will be conducted during daylight hours only.

The well, which is already been plugged and abandoned is being re-entered and re-plugged and abandoned with additional cement in accordance with ECMC requirements. During the work, a service rig and support equipment will be used to access the well and place cement plugs below ground. Nearby residents may notice temporary daytime equipment noise and limited vehicle traffic associated with the operation. Sound mitigation may be installed before the plugging operations to minimize noise impacts. GMT will conduct the work in accordance with applicable safety and regulatory requirements. The schedule may shift due to weather, equipment availability, or field conditions.
